

Press Release 2012/02 #1

## **Castlegem offering IPv6 enabled VPS and going public with lease to own offers**

### IPv6

With IPv6 becoming increasingly popular and in higher demand, Castlegem has made IPv6 available not only to dedicated server clients but also all virtual private server clients, effective immediately.

Many clients have already taken advantage of this offer, especially in our US West Coast, UK Manchester, and AT Vienna points of presence.

IPv6 is, of course, offered without charge to our clients and seamlessly integrates into our Solus control panel.

### Lease to own

During recent months, we have also received an increasing number of enquiries for lease to own offers – while we formerly used to keep this as an option for our corporate customers, we have now decided to offer lease to own to our entire client community. As of February 2012, all dedicated servers on offer can also be purchased via a tailor made lease to own contract. Subject to credit rating, offers are available for immediate buy-out, 12 months, 24 months, and 36 months contracts. No contract fee is being charged.
